

PHST medical ophthalmology recruitment – final assessment score distribution

The information within this document shows the distribution of interview scores for rounds 1 and 2 of PHST recruitment since 2014.

The scores are recorded for each candidate attending an interview, including those that were found not to be appointable.

All scores here have been rounded to the nearest whole number; and only those candidates who received both a score for their submitted application form and performance at interview have been included here. See the pages below for the number of candidates, including the percentage of those deemed appointable and non-appointable, interviewed in each round of recruitment; the range of scores obtained and the mean and median scores achieved across all candidates.

Where details for a specific year or round are not included, this should be taken to mean that the specialty was not participating in a particular round, had not yet joined the nationally-coordinated recruitment process, or there were an insufficient number of candidates to display scores.

2024 PHST Recruitment – final assessment score distribution (round 1)

The graph below shows the distribution of final assessment scores awarded to **medical ophthalmology** candidates assessed using a revised scoring method in PHST 2024 ST3 recruitment round 1.
